

Information for pet owners

The orthopaedic team is dedicated to helping your pet to live an active life. We understand that every orthopaedic patient is different and aim to tailor treatment individually to your dog and cat. Combining innovative technology and sophisticated procedures with a friendly, compassionate and attentive service is our goal. Close cooperation with you and your referring vet is imperative for us.

Prepare for your pet's appointment

Please don't feed your pet on the day of appointment. Pain medication should be stopped at least one week before the appointment. Please check with your vet or our reception if you are unsure.
