

Information for referring vets

We offer prompt appointments for referral cases. Cases are seen through the clinic in the morning of the appointment, and diagnostic tests are usually performed that day. The majority of cases are then scheduled for surgery the following day. BWe are always happy to discuss cases or give advice prior to referral.

Radiographs

We also provide a radiograph reading service. Please email radiographs or address to: SA Orthopaedic Service, QVSH, Dept. Veterinary Medicine, Madingley Road, Cambridge CB3 0ES.
